Soundproof Cabin | Soundproof Machine Enclosure | Welding Cabin | Tool Cabinet

WHAT IS THE PROCAB?

ProCab is a Finnish innovation that was born out of the need to improve the working environment, particularly in production facilities and industrial plants where the sound environment is constantly dangerously loud. It is a solution for protecting industrial people and machines from noise, dust, heat and other harms.

The ProCab product family includes:

- Soundproof Cabins
- Soundproof Machine Enclosures
- Welding Cabins
- Tool Cabinets

PROOCAB

SOUNDPROOF CABIN

READY-TO-USE

ProCab is an easy and fast solution when you need a soundproof work cabin for any kind of production facility. It's perfectly suitable as an office, a control room, a work management's workspace or as a clean room.

ProCab Soundproof Cabin is an innovation that protects people and machines from dust, heat and most importantly from noise.

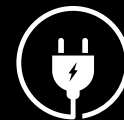

Up to 27 dB(A) noise reduction

Can be customized to fit your needs

**Mechanical air conditioning –
Cooling & Heating**

Provided with electrical connections

SOUNDPROOF MACHINE ENCLOSURE

SMART PROTECTION FOR MACHINERY

ProCab is an innovation that can bring down the noise level in an industrial production environment by 18–20 decibels. When a loud machine is insulated with an efficient enclosure, the safety and well-being of staff is improved significantly and the space around the machine is free to be used in new ways without the noise hazard.

CUSTOMIZABLE ENCLOSURE

The enclosure is always designed with the customer to find a perfect fit. Using the standard sized ProCab module panels makes the process from design to installation remarkably easy. Varying kinds of hatches and doors are available, so material coming in or out is not a problem.

Up to 20 dB(A) noise reduction

Improves the safety and well-being

WELDING CABIN

WELDING CABINS FOR DEMANDING ENVIRONMENTS

ProCab is not always about soundproofing. We have also built permanent Welding Cabins for more challenging environments. Due to its nonflammable and compact structure, the sparks are easy to control, and the risk of fire decreases significantly. The spreading of welding fumes into the surrounding space can be sufficiently prevented, and in addition, the cleanliness is increased too.

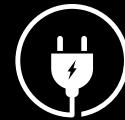

Designated hot work area

Can be customized to fit your needs

Welding fume extractor

Provided with electrical connections

TOOL CABINET

A PERFECT SOLUTION FOR KEEPING MACHINE TOOLS IN ORDER

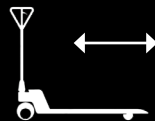

ProCab Tool Cabinet is an effortless and compact storage solution specifically designed for machine tools. Tool Cabinet helps you to maximize your storage usage and to keep the tools organized. Thanks to the vertical pull-out-drawers your tools are always easy to find, and the bilateral access to the tools enhances the ergonomics when working.

POSSIBILITY TO CUSTOMIZE

It is possible to customize the tool cabinet according to your wishes – colour, shelves, inserts etc. Tell us about your machines or tool kits so that we can do our best to get you a perfect fit.

1200 kg payload per drawer

Relocation by transpallet

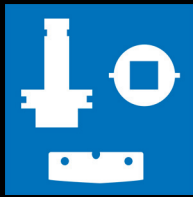

Lockable drawers

INSERTS

INSERTS FOR DIFFERENT MACHINES

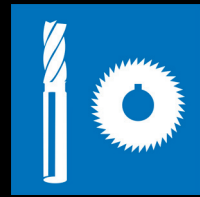

We have designed insert options for several machines for example punching machines, bending machines and milling cutters.

Punching tools

Bending tools

Milling cutter tools
